"It was great meeting you yesterday so that I could personally thank you and your company for providing us with the best slip proof runners available. Prior to being introduced to your product, we had researched countless products to place in our entrance way to keep customers from slipping during rainy weather. We had purchased rubber backed carpeting that would blow away in the wind or would curl up making it unsafe. After months of research we found your product, not only was it easy to install, but met all our needs and is pleasing to the eye. Again thank you for all your help."
