EYEWASH STATION MATTING

Do you know
where your
eyewash stations
are located?

EYEWASH STATIONS
DRENCHING STATIONS
FIRE BOXES

FACT

75% of workers are not aware of the location of their eyewash stations.

15 minutes of flushing from a drenching station equals **450 gallons** of water!

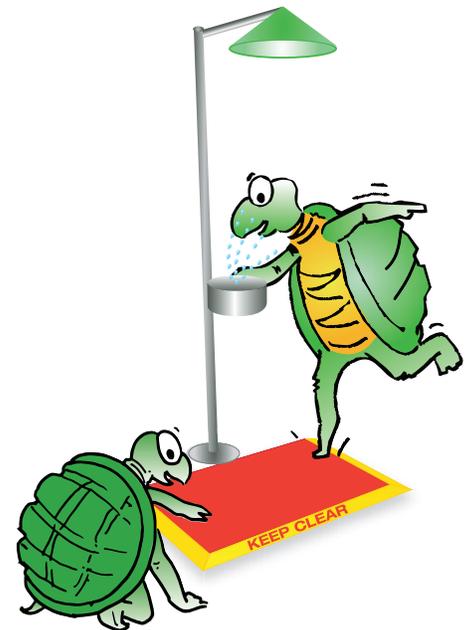

FACT

Many eyewash stations are blocked with pallets, boxes, and other debris.

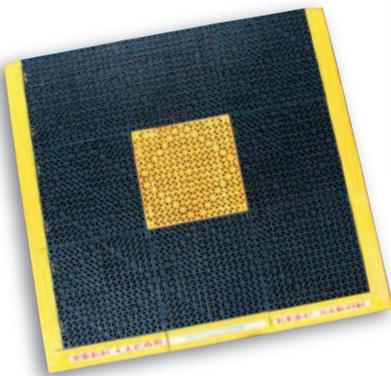

SOLUTION

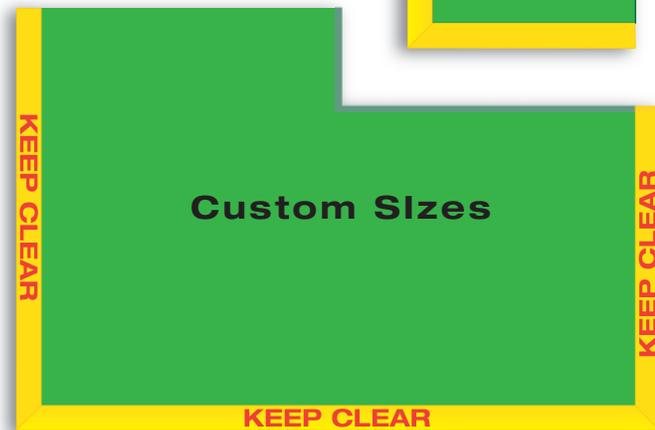

Slip-resistant flooring around eyewash station and drenching shower areas in safety colors: green, yellow, orange, red, edged with "KEEP CLEAR" signage.

The bigger and brighter, the better!

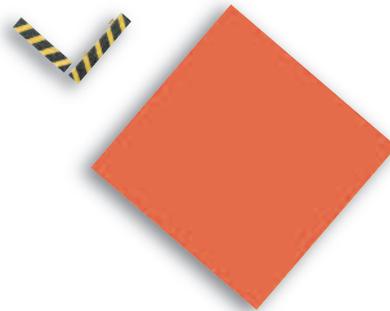

Bullseye optional.

- Bright colors make stations easier to locate.
- Standard sizes: 2X2, 3X3, 4X4, 5X5, 6X6, 8X8
- Custom pre-assembled matting in any size available.

Ramps

Available in standard yellow or grit stripe.

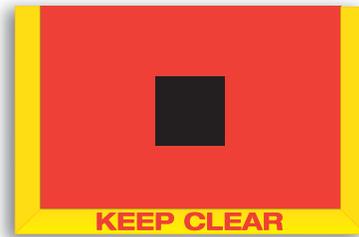

FIRE BOX MATTING

FACT

50% of fire boxes are blocked and workers do not know where they are.

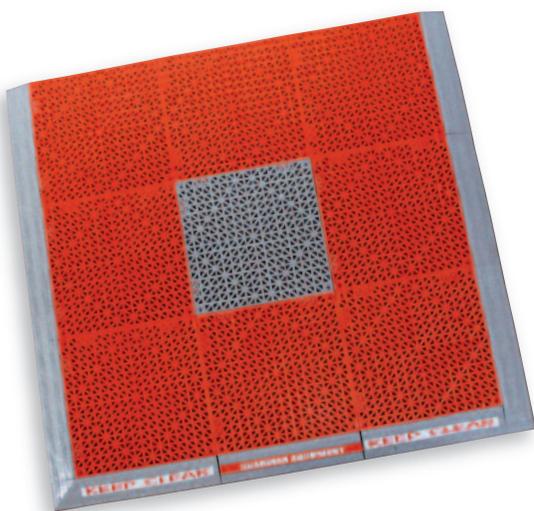

“KEEP CLEAR” ramps remind workers not to clutter fire box areas.

Bright red matting with black “bullseye” center makes fire box areas immediately identifiable.

Available in 2X2, 3X3, and 2X3 sizes.

Custom color combinations available.
